For the past sixteen years, The OctoberWoman Foundation has been committed to supporting innovative breast cancer research projects with an emphasis on raising awareness, improving diagnostic methods, and creating treatment options less toxic to the body. Its goal is to empower all women with 'Hope for the Future'. The foundation has strived to expand its support base and broaden its outreach and through this strong network has been instrumental in helping many people, not just women, find the doctors they need to battle cancer and other life threatening diseases. The same mission remains strong not just for women with breast cancer, but ALL battling illnesses.

Thank you again for your generous support and in helping us to provide 'Hope for the Future' for all.

Gratefully,

Judith DiBella
